

Email Cleaner Tool

What It Does

- Takes a CSV file of email leads (`leads.csv`)
- Cleans the data by:
 - Removing duplicates
 - Removing invalid emails (e.g. missing '@' or domain)
- Outputs a cleaned list to `cleaned_leads.csv`

Why It Matters

A clean email list improves:

- Deliverability (less bounce)
- Accuracy in CRM
- Saves time for outreach teams

Tech Used

- Python (in Google Colab)
- pandas
- re (regex)

Files in This Repo

- `email_cleaner_tool.ipynb` – main Colab notebook
- `leads.csv` – sample input data
- `cleaned_leads.csv` – cleaned output data
- `report.pdf` – 1-page summary of tool and logic
- `README.md` – you're reading it now!
